

German

Plugin: German

!!! This plugin is based on old nutch classes and not running with the current nutch version !!!

The plugin enables German-language stemming during indexing and searching. Unnecessary German stop words are removed from content and query.

The package contains:

- A German [BasicIndexingFilter](#) to replace the standard [BasicIndexingFilter](#)?
- A German [BasicQueryFilter](#) to replace the standard [BasicQueryFilter](#)?
- A stop-list "german-stopword.txt" used by both.

Download at <http://nutch.eventax.com/>

Config File Options

german.stopword.file

Default filename: german-stopword.txt

german-stopword.txt has to be placed into CLASSPATH/conf directory.

Syntax:

#List of stopwords:

der die

das and

a ...

Internal Documentation

The German Analyzer from the Lucene package is used.

The [GermanBasicIndexingFilter](#) works approximately 10

Searching

It is possible to use stop words in the query. They are ignored, but emphasized like normal hits.
