

RewriteBasics

Here we'll cover basics - what do the flags mean, and some intro regular expression stuff. This is not intended to be a complete regex tutorial, since there are better ones available. Just stuff specific to `mod_rewrite`. We should also cover the differences between using [RewriteRule](#) in `httpd.conf` vs `.htaccess` files.

- [RewriteRule](#)
- [RewriteCond](#)
- [RewriteEngine](#)
- [RewriteOptions](#)
- [RewriteBase](#)
- [Flags](#)
- [RewriteLog](#) and [RewriteLogLevel](#)
- [RewriteMap](#)
- "Rewriting" using [AliasMatch](#) and [Alias](#).
