

HackathonNA14

ApacheCon North America 2014 Conference Hackathons

This year, hackathons will take place throughout the conference, overlapping conference sessions. This gives attendees plenty of time for testing, bug fixing, documentation, brainstorming, design and more. Four rooms have been reserved throughout the conference for hackathons.

If your project requires more time, or wants a dedicated day to themselves afterwards, [fill out this form](#) to arrange for a dedicated room + day on the Thursday or Friday.

Hackathon Information

Hackathons will take place every day, in parallel with the main conference. Lunch, snacks and drinks will be provided throughout.

Anyone and any project with an idea for a hackathon session should propose it below. Once there's a bit of momentum, promote it to a specific slot and bag your room!

When you arrive at the Westin (Confluence Ballroom Foyer), a bulletin board will display each hackathon location and time. If you've already signed up for a hackathon, you can head straight to your room and get started! If you don't have a specific project in mind, you can consult the board to find likely suspects based on your interests and skills, then go and find the project and they'll help you get started.

Monday 7th April

Monday, April 7th from 10:45am to 5:45pm

Title	Room	Open To	Description, Projects etc
Apache Mavibot	Room 1	Any developer	Interesting algorithms to be discussed : free pages management, in-memory transaction support and such
Apache Stratos	Room 2	Any Developer	Building new Cartridges, supporting other load balancers supporting new IaaSes via Apache jclouds
Apache Flex	Room 3	Any Developer	Coding, Bug Fixing, Find out about it!
Small and Adhoc	Room 4	Anyone	No particular thing in mind? There's always small groups fixing bugs, designing new ideas, prototyping, documenting etc. Pop along and find an interesting group to join!

Tuesday 8th April

Tuesday, April 8th from 10:30am to 5:30pm

Title	Room	Open To	Description, Projects etc
Apache Cordova	Room 1	Developers wanting to get started with Apache Cordova hybrid mobile application development or who need help from Cordova committers and experts with issues they are facing with their Cordova projects.	Apache Cordova
Apache Stratos	Room 2	Any Developer	Building new Cartridges, supporting other load balancers supporting new IaaSes via Apache jclouds
Enhancing Apache Flex Maven Support	Room 3	Any Developer	Discussing/Implementing ways to publish Flex SDK as Maven Artifacts, Making Flexmojos support Falcon and FlexJS
Small and Adhoc	Room 4	Anyone	No particular thing in mind? There's always small groups fixing bugs, designing new ideas, prototyping, documenting etc. Pop along and find an interesting group to join!

Wednesday 9th April

Wednesday April 9th from 9:00am to 3:00pm.

Title	Room	Open To	Description, Projects etc
TBA	Room 1		

TBA	Room 2		
Apache Gora	Room 3 (AM)	Anyone interested in big data persistence	See JIRA
http://tika.apache.org	Room 3 (PM)	Java coders, Scripting language implements, docs writers	Help expand Apache Tika to support new languages, and document the process
Small and Adhoc	Room 4	Anyone	No particular thing in mind? There's always small groups fixing bugs, designing new ideas, prototyping, documenting etc. Pop along and find an interesting group to join!

Thursday / Friday

Currently, no hackathons are scheduled for the Thursday or Friday. If your project requires more time, or lots of space, or wants a dedicated day to themselves afterwards, [fill out this form](#) to arrange for a dedicated room + day on the Thursday or Friday.

Enhancing Apache Flex Maven Support	Friday	Any Developer	Adding features for mobile packaging to Flexmojos
-----------------------------------------------------	--------	---------------	---------------------------------------------------

Proposed Hackathons

If your project is thinking of hosting a hackathon session, or you think there's an interesting topic to be cover, please list it here. If you see a proposed session you'd like to attend, +1 it so that people know it's of interest! Once a session gets enough people interested, we'll promote to the confirmed list, and prepare a sign for the table so you can find it.

For hackathons without large levels of interest, we'll try to provide some space in the general room, and people can just get together on a more adhoc basis to work. Please post a sign if you do that though, so others can try to find you!

Title	Day/Time	Open To	Description, Projects etc	Interest
<i>Apache Example</i>	Tuesday	<i>Testers and Documention people</i>	Doing great things with examples	4
