IrcHangouts

Before, during, and after the conference, you are encouraged to participate in the meta-conference on IRC. Freenode is the official IRC network of ApacheCon. ApacheCon attendees tend to congregate on `#apachecon` on `irc.freenode.net`.

There will also be per-track IRC channels, called `#actrack1`, `#actrack2`, `#actrack3`, and `#actrack4`.

Note that general technical questions about the Apache webserver are usually held on `#apache`. Many individual ASF projects also have project-specific channels where they discuss technical or community issues about their projects.
