

OpenForBusiness

Note! Due to the continuing popularity of our business-focused sessions, future [ApacheCons](#) will expand sessions focused on business, legal, and organizational topics. See the schedule grid for each conference to see when these tracks are!

Managers, business people, IT folks take note: we've added an entire track on Monday about the business of open source. As the Special Events page notes:

- An entire track of sessions on Monday will focus on the needs of today's business professional. Starting with "The Zen of Free" presented by Simon Phipps, Chief Open Source Officer for Sun, we will explore which licenses and business models work and which don't, what the 'signature triangle' of an open source community looks like, and much more!

See the [Schedule Grid](#) for sessions in this track (Last track, starting with MO4).
