Navigation trail: [JMeterProjectPages](#) - [JMeterDevelopment](#)

This page brings together some links on Gump

The jakarta-jmeter Gump module has 4 projects:

```
jakarta-jmeter - build from latest of everything; does not create any output zips/jars
jakarta-jmeter-cvs - build from CVS only, and create output zips of the jars
jakarta-jmeter-javadoc - javadoc
jakarta-jmeter-test - test JMeter using build produced by jakarta-jmeter-cvs
```

There are several systems running Gump, but only two of them (Covalent and LSD) have output directories. These are shown in the list below.
