Project Plan

Release Manager: APACHE_ID

Milestones

- Beta1 - based on svn revision xxx: DATE
- Beta2 - based on svn revision yyy: DATE
- Feature Freeze, create branch: DATE
- Release Candidate 1: DATE
- Release Candidate 2: DATE
- Release DATE

Dependencies

Projects we depend on and their forthcoming releases (with url)

- Xerces
- Xalan
- Java
- JUnit

Projects that depend upon us, and their cutoff dates and urls

- Eclipse
- NetBeans
- IntelliJ IDEA
- CruiseControl
- JEdit (less tightly coupled)

Announcements

English

text by: release manager

addressees

Environment/Compatibility

Old JDKs can be downloaded from Suns [archive](#).

Linux Platforms should cover common distros: RHEL, Suse, Debian (Ubuntu)?

SysV Unix can be delegated to the vendors, say AIX and HP/UX.

Solaris is also a possibility, if a VMware image is available.

WinXP

- Java 1.3 - Java 6: must pass
- Java 7: may pass

Vista

- Java 1.3 - Java 6: must pass
- Java 7: may pass

Linux

- Java 1.3 - Java 6: must pass
- Java 7: may pass

SysV Unix

- Java 1.3 - Java 6: must pass
- Java 7: may pass

MacOS

- Java 1.3 - Java 6: must pass
- Java 7: may pass

OpenVMS

- Any Java: may pass

Netware

- resnet Java: should pass

Solaris

Features & Bugs

Describe what this release should contain. When referring to a Bug, provide the Bug ID, the URL and a short description.

"Must have" Features / Bugs

These are the features or bugs that hold the build; fallbacks to be listed. To add something here you must be prepared to implement (fix) it, or know someone who is. Everything needs a name.

"Want" Features / Bugs

Less critical, but still nice. Adding here is also a statement of intent.

"Like" Features / Bugs

Less important stuff.

"Wontfix"

Definitely not in this release. Pull stuff down here when scrubbed from the previous lists.
