{{ http://avalon.apache.org/images/project-logo.gif }}}	This is the wiki for the Apache Avalon project. This wiki is a community wiki and the entire Avalon community is invited to help maintain it. Feel free to change any part of this wiki if you think it improves things. In particular, we'd very much appreciate it if you help document the answers to questions asked on the mailing list on the FrequentlyAskedQuestions page. Notifications of all changes you make will be sent to the avalon site-cvs mailing list , so we'll be aware of your changes and we'll happily correct any small mistakes you may make!
