

# AvalonExcaliburBuildRefactoring

## Avalon-Excalibur Mavenization TODO

These packages still need to be upgraded to use maven.

- logger

## Avalon-Excalibur Gump Enablement TODO

These packages need to get an ant file for the purpose of gump builds and have their gump descriptors updated.

- configuration
- event
- i18n
- logger

## Avalon-Excalibur Documentation TODO

These packages need to get a better description and some documentation on the website and/or better javadocs:

- compatibility
- component
- datasource
- event
- instrument
- instrument-client
- instrument-manager
- lifecycle
- logger
- monitor
- pool
- sourceresolve
- store
- thread
- xmlutil
