

HowTo

Avalon HOWTO Documentation

Welcome to the Avalon HOWTO section. HOWTO's are sort tutorials and explanations on how to accomplish a particular task or make use of a particular feature of Avalon.

Basic Component HOWTO's

- [SimpleComponentExample](#) : how to write a simple Avalon component (i.e.- **start here**)

Embedding Avalon Containers

Examples on embedding Avalon into various environments. All of the following use the [SimpleComponentExample](#). All of these HOWTO's are aimed at answering the question, "How do I access Avalon components from non-Avalon components?"

- [FortressStandaloneExample](#)
- [FortressServletExample](#)
- [FortressSwingExample](#)
- [MerlinStandaloneExample](#)
- [MerlinServletExample](#)
- [MerlinSwingExample](#)

Miscellaneous

- [LogRotation](#)
- [Excalibur](#)
- [ExcaliburStoreExample](#)
- [Exporting Services – Object Brokering Options in Avalon](#)
- [Overview of Deployable Resources](#) (SAR & blocks vs EAR/WAR)
- [AvalonContainerWriting](#)
- [How to Generate and Publish Avalon documentation](#)
- [AvalonRepositoryAndWebStart](#) – a comparison between Avalon Repository and Java [WebStart](#). Shows some tips and tricks with Merlin too!
