

V1m1KnownIssues

The following is a list of issues known to exist in the Beehive 1.0m1 binary distribution (Still UNRESOLVED). Some of these issues are related to code supporting the distribution, such as test infrastructure, but they are not broken out separately here. For more information on these issues, please access the Beehive JIRA repository, which can be found here <http://issues.apache.org/jira/browse/BEEHIVE>

Key and Summary

<http://issues.apache.org/jira/browse/BEEHIVE-797>

query strings not being restored when using nested page flows.

<http://issues.apache.org/jira/browse/BEEHIVE-796>

Faults are not handled in Service control

<http://issues.apache.org/jira/browse/BEEHIVE-795>

Missing compile error when annotating a shared flow as "longLived"

<http://issues.apache.org/jira/browse/BEEHIVE-781>

web service control leaks two input streams when creating a service control

<http://issues.apache.org/jira/browse/BEEHIVE-780>

WSM leaks `InputStreams` at build time

<http://issues.apache.org/jira/browse/BEEHIVE-779>

`ScopedRequestImpl.restoreAttributes()` should not point the `ScopedAttributeContainer` at the Session's stored attribute `HashMap` instance

<http://issues.apache.org/jira/browse/BEEHIVE-767>

"navigateTo" current page does not work with tiles

<http://issues.apache.org/jira/browse/BEEHIVE-762>

controls annotation processing doesn't recognize java.io.Serializable on super classes

<http://issues.apache.org/jira/browse/BEEHIVE-760>

selected tree item getting set after the selectionAction is run

<http://issues.apache.org/jira/browse/BEEHIVE-757>

503 error when `@Jpf.Catch` forwards to an error page with a compile error in it

<http://issues.apache.org/jira/browse/BEEHIVE-756>

Major badness when moving between page flows in the same request, with multiple concurrent requests

<http://issues.apache.org/jira/browse/BEEHIVE-751>

need to separate wsm build time jar from run time

<http://issues.apache.org/jira/browse/BEEHIVE-745>

methods with same name in JWS cause NPE during WSDL gen

<http://issues.apache.org/jira/browse/BEEHIVE-744>

Invalid error when 'redirect' is used with 'action' on `@Jpf.Forward`

<http://issues.apache.org/jira/browse/BEEHIVE-739>

A url template ref without a key element causes an NPE in `URLTemplatesFactory`.

<http://issues.apache.org/jira/browse/BEEHIVE-730>

service control generation produces ".jcx" files instead of ".java"

<http://issues.apache.org/jira/browse/BEEHIVE-717>

minor non-conformance of exceptions to JSR-181 / JAX-RPC 1.1

<http://issues.apache.org/jira/browse/BEEHIVE-716>

Page partially rendered if error occurs in included page

<http://issues.apache.org/jira/browse/BEEHIVE-705>

Service Control needs to be aware of the elementFormDefault attribute in registering types.

<http://issues.apache.org/jira/browse/BEEHIVE-703>

RPC/Literal in Header is not working in Service Control

<http://issues.apache.org/jira/browse/BEEHIVE-689>

WSM Javadocs

<http://issues.apache.org/jira/browse/BEEHIVE-680>

Generated source from control files shows warnings inside of eclipse

<http://issues.apache.org/jira/browse/BEEHIVE-635>

Tomcat PageflowValve does not check for security-constraints defined in web.xml

<http://issues.apache.org/jira/browse/BEEHIVE-609>

URLs in response from XmlHttpRequestServlet for XHTML doc contain '&' char

<http://issues.apache.org/jira/browse/BEEHIVE-600>

Document Literal Wrapped webservice missing methods in wsdl

<http://issues.apache.org/jira/browse/BEEHIVE-599>

Document Literal Wrapped webservice wsdl fails to compile

<http://issues.apache.org/jira/browse/BEEHIVE-596>

WebParamRpcLiteralSample's wsdl is not valid

<http://issues.apache.org/jira/browse/BEEHIVE-583>

ControlContainerContext is not ensured on JWS with programmatic control usage

<http://issues.apache.org/jira/browse/BEEHIVE-542>

Multiple popup scripts generated when multiple popup config exist in one page

<http://issues.apache.org/jira/browse/BEEHIVE-441>

Need docs on <netui-data:xxx> tags

<http://issues.apache.org/jira/browse/BEEHIVE-440>

Need docs on <netui:tree> and related tags

<http://issues.apache.org/jira/browse/BEEHIVE-307>

Struts validator support for the msg and args' bundle attribute is not working
