

AndrewCates

I am just a beginner on Cocoon. I love Wikis and find them a great way to learn. I am also known as BozMo in Wiki sites and contributes to quite a few.

e.g. [BozMo](#) Wiki:AndrewCates [MeatBall](#):AndrewCates

I have a non Wiki homepage at

[Andrew Cates](#)

and is a mathematician who works as a manager for a children's charity e.g. at [children charity](#).

I think that Wikis are the way forward for communication but am interested in the differences in behavioural rules and in software in the way they work.

Well I am in the new Wiki, judging by [RecentChanges](#) I was pretty much first in and I have to say I think it is great. The new [FrontPage](#) looks much better and fresher but the [SiteNavigation](#) doesn't work yet...

Andrew
