

Blockathon

The goal of the Blockathon is to work on the implementation of [real blocks](#). This will include further discussions on the design but also some actual coding (e.g. [OSGi integration](#)) to get things going.

Some info about what's actually happening can be found at [Blockathon2005Report](#).

The Cocoon Blockathon takes place from 17th of July (Sun) to 19th of July (Tue). As the first day is not an official Hackthon day, Torsten was able to come up with an alternative (<http://100days.de>). 100days kindly provides a seminar room with beamer and flipchart and even some coffee ☺. We also need to work out when to start (maybe 11:30?). The venue is at:

Christophstraße 6, 70178 Stuttgart

[How to get there](#)

Please enter your name and when you plan to attend the Hackathon in the table below. Also don't forget to register for the official Hackathon on Monday and Tuesday by adding your name to the according file in committers SVN. (mail was sent out on May 25th, by David Reid).

Participants

name	days	country	comments
Alfred Nathaniel	Mon, Tue	Switzerland	Arriving Monday morning
BertrandDelacretaz	Mon, Tue	Switzerland	I will arrive on Sunday late evening and I will also stay in http://smg.nethotels.com/english/pflieger with these guys. Sounds cool.
