

Ilyanov

Hello, I am **Suhail M. Ahmed**, I happen to live in Amsterdam, The Netherlands. I am your average cultural refugee, running from everything to everywhere.

I also consider myself a mediocre Cocoon Programmer after dark. While during the day I do a lot of J2EE applications for a living. During the wee hours past midnight you will find me working on building a portal application using Cocoon. As if Cocoon needed yet another portal application. If you want to get in touch with me, drop me a line suhail@planet.nl. My useless ramblings can be found in my mostly underutilized [blog](#)
