JeffConrad

Hello,

I was a quantitative hydrogeologist until I switched over in 1998 to environment-friendly web applications. I have been a user interface developer for Lawson Software ever since.

Regarding Cocoon,

- I have been a proponent of Cocoon since getting involved with it in early 2004.
- We are currently using Struts and cocoon via a struts plugin.
- I have applied modifications to Don Brown's struts-cocoon plugin to allow it to work with cocoon 2.1.4.
- I have written and modified several cocoon generators to handle custom pipelines.
