

# LepidoProjectPlan

The project plan lists the Lepido features and organizes them in milestones.

## Milestone 1

This milestone basically consists in porting the current Eclipse 3.0-based plugins to Eclipse 3.1 and WTP:

- Port AXE platform to Eclipse 3.1 and WTP
- Sitemap editor (AXE-based)
- Form definition editor (AXE-based)
- Autocompletion XML editors for common Cocoon XML dialects: JXTG, XSP, form templates, i18n, cinclude/xinclude
- Basic project wizard
- migrating to WTP 1.0

## Milestone 2

- Debugger infrastructure
- Sitemap debugger
- XSLT debugger

## Milestone 3 and later

- More debugger drivers: Rhino, CForms binding
- Monitoring and profiling with TPTP
- Refactoring

Do not hesitate to add new features and comment on the milestone contents.

## Suggestions

It would be so cool, to have **code completion** in [FlowScript](#)! When this will be available in Lepido, in my company everyone will use this IDE and the ongoing discussions about the disadvantages of Java (Servlets) compared to [FlowScript](#) will have an end, because the most disadvantage of [FlowScript](#) in my opinion and the opinion of my workmates is the missing code completion...
