MarkLeicester

Mark Leicester

Hi there. I'm a New Zealand-born, London-based IT consultant and contractor specialising in the building of community-oriented web sites.

I'm a part time conductor/musical director. Probably as result of this I contributed the MIDI block to Cocoon. I took a MIDI to XMidi converter written by Peter Loeb and created an XMidiGenerator, XMidiSerializer and also some stylesheets for MIDI manipulation (inversion and transposition). For more about this see the MIDI block page.

My corporate site is http://www.efurbishment.com/ and my personal blog is at http://www.ordinaryfool.com/.
