

MaspalomasEvent

I've been handled the technical managment of an internet party in Maspalomas for April 2005.. It's going to last 3 days, and there's going to be a lot of partying and gaming events, but the organization also wants some brainy content to go along with it, so i thought we could throw a cocoon event in the mix..

I bet most of the scandinavians in here will know about Maspalomas, Gran Canaria. It's hot and sunny for the whole year, so if you want to take a week of sunbathing, combined with some cocoon productivity, tell me. If there's enough people **really** interested, i could talk the sponsors into it and get some local financing and reduced hotel rates.

Please post your thoughts in this wiki page or mail [NachoJimenez](#).

Can you give URL of the main Maspalomas event page? [Argyn](#)

Not there yet... it'll be in [www.ratones.info](#), but still under development.
