

NilsMueller

Hi,

since the Gettogether in Gent 2003 I've become a fan. My former company [Virbus AG](#) in Leipzig, Germany has been using Cocoon for a while, but since there were many [JoergHeinicke](#) there very knowledgable about Cocoon, I've never had to dig in my own.

At the Gettogether I was especially impressed with Woody (Cocoon Forms) and think this will be my first focus when exploring Cocoon further.

I do Java development and am a consultant for website usability and information architecture (Cocoon website needs work 😊). Since beginning of 2004 I work for [Accenture Technology Solutions](#) in Frankfurt, Germany.

take care

Nils
