

# SitemapInJAR

## Mounting sitemaps located in .jar

based on thread <http://marc.theaimsgroup.com/?t=109454930900002&r=1&w=2>

### Example

```
<map:match pattern="test/**">
  <map:mount check-reload="yes" src="resource://test/" uri-prefix="test"/>
</map:match>
```

where a file called sitemap.xmap exist in package "test".

### More

*in the same way any kind of files can be retrieved from packages just using resource:// protocol*
