

Th

Hello,

my name ist Thomas Hartwig. I'm looking for a good CMS with a wide possibility to extend it. I'm evaluating Lenya for use in a professional area. I think Lenya/Cocoon has the best future for this. The perfect solution would be a mix with Struts, see here: <http://struts.sourceforge.net/struts-cocoon/>

Unfortunately I had no time yet to look into it, so did you?
