WindowsCocoonAdvancedInstallation

Windows 2000-XP/Cocoon 2.1.4/Apache 2.0.49/Tomcat 5.0.19/MySQL 4.0.18 Installation

Martin Bouman & Richard Korthuis

Version 4.0 - 19 May 2004

The attached installation document (see below) can also be used with newer versions than mentioned above.

The attached Installation_XML_Server_4.0.doc provides detailed instructions on installing Cocoon combined with Apache Web Server, Apache Tomcat and, optionally, MySQL.

An example application is provided (source code) showing how to present content from an XML document in HTML, WML and PDF. Optionally one can use a MySQL database to generate the XML document.
