- Subject: Excalibur PMC Board Report

This is the december board report for the excalibur project.

- we added a new committer: Leo Sutic. (Leo has previously been active within the avalon project.)
- we added a new committer: Marcus Crafter. (Marcus has previously been active within the avalon project.)
- we took over responsibility of some codebases from the avalon project:
 - Avalon-Framework
 - Logkit
 - Cornerstonemigration of these codebases to the excalibur project has been initiated. Some things (like updating some parts of our website) still need to be finished.
- thanks to a lot of help from the gump community excalibur is now building much better in nightly gump runs.
- there were no changes in PMC composition and no releases.

best regards,

Leo Simons on behalf of the Excalibur PMC
