ToDo

Things that need doing, or might be useful to consider.

URGENT

- The "View your registration confirmation." link (on the personal page) does not work and results in a page with a the error message "Failure; Data Inconsistency"!

Needs

- Schedule page: Each day should list the end time of the last session, especially with the closing plenary people want to know when it ends.
- Move external speaker images to apachecon server (and resize if necessary)
- Remove tutorial column T03 completely from schedule
- Document the `faqtoid` IRC bot in the public ApacheCon wiki

Nice-to-Have
