

JCS promotion to SLP

Promotion of JCS

Bugzilla change

Looks to be in Scarab. Are we migrating out of this? Does it need any work?

CVS change

Either:

1. Migrate Turbine to SVN, then use svn move to migrate up and modify svn authorization.
2. ssh onto cvs.apache.org; mv the cvs dir to a new repo level and modify cvs avail. (then later migrate)

jakarta.apache.org change

1. Modify jakarta.apache.org, and java@apache page.
2. mv turbine/jcs up a directory
3. .htaccess redirect at the turbine level
4. remove links from turbine.

DONE

mailing list change

Rename turbine-jcs-user@jakarta.apache.org to jcs-user@jakarta.apache.org and turbine-jcs-dev@jakarta.apache.org to jcs-dev@jakarta.apache.org.

<http://issues.apache.org/jira/browse/INFRA-216>
