

JakartaBoardReport-January2011

Jakarta status report, January 2011. There are no issues requiring board attention at this time.

General

We completed the moves of two subprojects to the Apache Attic: Jakarta ECS and Jakarta ORO.

Few improvements were made to the website, including the Jakarta news feed, by sebb.

We added one new PMC member, Milamber. Martin Cooper withdrew from the PMC.

Releases

- None

Subproject news

BCEL

One new issue reported, no other activity.

BSF

No notable activity this quarter.

Cactus

Small number of posts to the user list and a thread about the Gump build on the dev list.

JCS

Some user list and tracker activity, one new issue reported.

JMeter

Healthy activity on the user list as well as in development and bug fixes. Sizeable number of new issues opened in the tracker (25+), including a few with patches from users.

Regexp

No notable activity this quarter.
