

Lenya, maven and C2.2

- Warning : this page describe an "in progress work".

Build current trunk

- checkout the current lenya trunk
- an svn:external propertie will checkout for you a version of cocoon2.2
- go to externals/
- run build.sh : this script will apply a non-solve - for now - dependencie bug and install cocoon
- return to your lenya parent folder
- build with maven install -Dmaven.test.skip=true
 - some tests are falling for now

Run lenya

- go to org.apache.lenya.webapp
- do maven jetty:run
- open browser and go to localhost:8888/
- help us to solve bugs ! 😊
