## Shale X.Y.Z Release Plan

### Info

- 1. [Release Guidelines](#)
- 2. [Signing Releases](#)
- 3. Apache [Mirroring Guidelines](#)

### Release Manager

The release manager is XXXXX YYYY

### Special Issues

FIXME - Identify any special issues related to this release, or remove it if there are none.

### Outstanding Issues Review

The following links perform live queries against the JIRA issues database for Shale (for bugs, RFEs, and tasks, respectively), so the content will change as issues are added and addressed.

#### Outstanding Bug Review

FIXME - link to a JIRA query

FIXME - list any commentary on specific issues listed by the previous query

#### Outstanding Enhancements Review

FIXME - link to a JIRA query

FIXME - list any commentary on specific issues listed by the previous query

#### Outstanding Tasks Review

FIXME - link to a JIRA query

FIXME - list any commentary on specific issues listed by the previous query

### Preparation Checklist

FIXME - all following text was just copied from the 1.0.2 release plan and needs to be customized.

	Description	Status
1.	Announce plan to dev@ list	✓
2.	Review/Complete Remaining Development Tasks	✓
3.	Review/Resolve Outstanding Bugs	✓
4.	Update Release Notes	✓
5.	Check Dependencies	✓
6.	Update to version 1.0.2 default.properties, project.xml, build/maven2/*.pom	✓

The Commons [Preparation Guide](#) is a helpful preparation backgrounder, but Commons uses the "beta/release-candidate/final" process.

Likewise, the [HTTPD Release Guidelines](#) is a helpful "overall process" backgrounder, but HTTPD does not use a test-build stage.

Dependency versions for this release:

Dependency	Version	Status	Used In
------------	---------	--------	---------

Commons BeanUtils	1.7.0	Released	core, clay
Commons Chain	1.0.0	Released	core, clay
Commons Digester	1.7.0	Released	core, clay
Commons Logging	1.0.4	Released	core, clay, test, usecases
Commons Validator	1.2.0	Released	core
<a href="#">JavaServer Faces</a>	1.1	Released	core, clay, test, usecases
Spring Framework (Optional)	1.2.2	Released	core
Struts Tiles Standalone	—	Struts Sandbox	core
<a href="#">HtmlUnit</a> (Optional)	1.6 or 1.7	Released	test, usecases

Because this is a test build release, a dependency on an unreleased component is acceptable.
