

# TargetPlatforms

|                       | Target platforms for stdcxx 4.2.x |               |
|-----------------------|-----------------------------------|---------------|
| Category              | Operating System                  | Compiler      |
| Primary               | HP-UX 11i                         | HP aCC 6.16   |
| HP aCC 3.74           |                                   |               |
| IBM AIX 5             | IBM XLC++ 9.0                     |               |
| Linux                 | gcc 3.4                           |               |
| gcc 4                 |                                   |               |
| Intel C++ 10.0        |                                   |               |
| Solaris               | Sun C++ 5.9                       |               |
| Windows               | Intel C++ 10.0                    |               |
| MSVC 8.0              |                                   |               |
| MSVC 9.0              |                                   |               |
| Secondary             | IBM AIX 5                         | IBM XLC++ 8.0 |
| IBM XLC++ 7.0         |                                   |               |
| IBM VisualAge C++ 6.0 |                                   |               |
| FreeBSD               | gcc 3.4                           |               |
| HP-UX 11i             | HP aCC 6                          |               |
| HP aCC 5              |                                   |               |
| HP aCC 3              |                                   |               |
| Linux                 | gcc 3                             |               |
| EDG eccp 3            |                                   |               |
| Intel C++ 9.1         |                                   |               |
| Sun C++ 5.9           |                                   |               |
| Sun C++ 5.8           |                                   |               |
| Solaris               | Sun C++ 5.8                       |               |
| Sun C++ 5.7           |                                   |               |
| Sun C++ 5.6           |                                   |               |
| Windows               | Intel C++ 9.1                     |               |
| MSVC 7.1              |                                   |               |
| Best Effort           |                                   |               |
| Darwin                | gcc 4                             |               |
| IRIX                  | MIPSpro 7.41                      |               |
| Solaris               | EDG eccp 3                        |               |
| Sun C++ 5.3           |                                   |               |
| Tru64 UNIX 6.5        | HP C++ 7.1                        |               |
