org/omg/PortableServer/POAManagerPackage/AdapterInactive
org/omg/PortableServer/POAOperations
```

I generated a list of required classes for Apache Geronimo by taking geronimo-jetty-j2ee-1.0.tar.gz and running it with:

```
java -verbose:class -jar bin/server.jar
```

Using a browser, I then click most of the links on the interface pages - enabling jetty statistics and starting the sample application.

I then compared the resulting list of 606 JRE classes against those found in the jars generated by a build of Classlib r386322. 495 classes were found. The list of classes still required are:
