Apache XML Graphics Project

Board Report

The Apache XML Graphics Project is responsible for software intended for the creation & maintenance of the conversion of XML formats to graphical output & related software components.

Issues for the Board

No issues at present.

Community

Last new committer: Robert Meyer on 05/08/13

Last new PMC member: Luis Bernardo on 04/03/13

The PMC discussed the problem of lack of active committers on Batik sub project. There are some users logging bugs and posting occasional patches into JIRA, but no one to process them. The PMC has agreed to allow all PMC members commit access to all XML Graphics sub projects regardless of their originating sub project. The vote has just concluded, so an adjustment to the auth template file will be made later this week to implement this. It is hoped that some of the FOP committers will periodically process Batik patches to stop the sub project from dying.

XML GRAPHICS COMMONS

2 bug fixes committed to SVN, and code added for OTF CFF Font support

There were no releases this quarter.

The latest release is 1.5 (20 October 2012)

FOP

User mailing list has several questions posted and answered each week. Some new bugs logged and several patches have been submitted and processed. 27 separate commits in total to SVN. Significant new features of note, started in this quarter are; support for a whitespace management extension and fo:inline-container. Development for both have been started in branches and several commits made to each as work progresses.

There were no releases this quarter

The latest release is 1.1 (20 October 2012)

BATIK

Mailing list activity was very light. A few bugs have been reported by users and a couple of patches submitted. Zero commits to the codebase, which is why the PMC started a discussion on how to deal with the patches and bugs being logged.

There were no releases this quarter.

The latest version is 1.7 (6 January 2008)
