## Windows Applications

The following are commercial products for Microsoft Windows which use [SpamAssassin](#). See also tips for [UsingOnWindows](#) with the free version. Other versions: [CommercialWindows](#), [CommercialMacOSX](#), [CommercialUnix](#), [CommercialNetworkAppliances](#), [CommercialISPs](#), [CommercialMaybe](#)

### Listing

- [@Mail WebMail + Email-server](#) - Commercial Web-Mail/Email-server for Windows , includes Spamassassin, Anti-Virus, Web-Mail, Groupware and Multi-language ability.
- [ActivSoftware Email Application Server](#) - a gateway/server that supports load balancing spam assassin.
- [AltN Technologies Mdaemon Mail Server](#)
- [Breath! Spam Filtering for POP3 Clients](#) - a simple and cost-effective solution for removing spam from incoming mail
- [Catch! for Windows](#) - Cheap, with unlimited domains and users, SMTP proxy for any Windows mailserver. Implements [SpamAssassin](#), Virusscanning (f-prot or ClamAV) and several other heuristics to keep mailboxes clean. Settings can be configured at any level, global (all domains), individual domains and per user. Implements inheritance for settings.
- [CleanMail Server](#) - Easy-to-use, extensible, multi-purpose SMTP/POP3 proxy providing a complete email security solution: a built-in attachment blocker, integrated [SpamAssassin](#) and ClamAV anti-virus. Works with every mail server software. Other features are: virtual hosts, mail flooding protection, and realtime monitoring, just to name a few.
- [CleanMail Home](#) - Complete Email Security for any POP3 email client on Windows: built-in attachment blocker, integrated [SpamAssassin](#) and ClamAV anti-virus.
- [DomSpamC & DSCleaner - DomSpamC](#) => Filter interface for Lotus Domino. DSCleaner => User-based bayesian learner interface for Lotus Notes.
- [eMail2Pop for AOL® and Gmail](#) - eMail2Pop interfaces with America Online and Google Gmail accounts to provide POP3 and SMTP access to AOL mail and Gmail. Complete integration of [SpamAssassin](#) allows users to take advantage of spam filtering of AOL POP3 and Gmail POP3 mail with little configuration required.
- [ExchangeServerToolbox](#) - is a plugin for Microsoft's Exchange Server 2003/2007/2010. [SpamAssassin](#) is used to identify spam mail. Many actions can be done on identified spam mail as the spam detection is realized as a condition in a powerful rules engine. Additionally the integrated ClamAV or any installed virus scanner can be used to identify mail messages that are infected by a virus or Trojan. [ExchangeServerToolbox](#) enables you to make a backup of all incoming and outgoing mail messages of your Exchange Servers SMTP.
- [IceWarp Mail Server](#) - Can act as filtering SMTP proxy, with fully compatible configuration files, rule syntax and variables. Multi-threaded [RegEx](#) engine ensures low latency to traffic. Rules support UTF-8 for customization to language specific spam. Built-in rule statistics record hits to each rule to a log. X-Header reporting. (For Windows and Linux)
- JESMS ([Sun Java System Messaging Server](#)) includes preintegrated "Spam- Assassin" <sic>, an "open source, antispam application". (For Solaris, HP-UX, Linux, and Windows)
- [Kerio Mailserver for Windows, Linux and Mac - SpamEliminator](#) analyzes each email message against multiple criteria and gives it a numerical rating. If the message rating exceeds the threshold set by the user, the message is marked as spam and filtered according to the user's wishes.
- [Lyris MailShield](#) - Anti-spam protection for servers, workgroups, and personal desktops.
- [Mailshell Domino Plugin](#) - This free Domino plugin can create a spam folder in each user's Domino mailbox and move any incoming message that is marked with a specific mail header by anti-spam software like [SpamAssassin](#), to that folder.
- [Mailshell Exchange Plugin](#) - This free Exchange plugin can create a spam folder in each user's Exchange mailbox and move any incoming message that is marked with a specific mail header by anti-spam software like [SpamAssassin](#), to that folder.
- [Mailtraq](#) - Mailtraq is a comprehensive messaging server and Exchange alternative which includes integrated support for [SpamAssassin](#) along with many other anti-spam and anti-virus features.
- [McAfee® SpamKiller® for Mail Servers](#).
- [Mail Them Pro](#) is a mailer which has built-in Spamassassin and allows to check email before mailing with Spamassassin to prevent email being considered as a spam
- [MxScan for MailEnable - AntiSpam and AntiVirus](#) plugin for [MailEnable](#) Email servers
- [Pinjo revealer](#) - Pinjo revealer is a SMTP proxy filter for mailservers. Easy configurable blacklists, complete [SpamAssassin](#) 3.0 implementation, mail distributing, anti-virus possibilities, mail forwarding to alternate addresses, statistics. Usable for all SMTP mailservers.
- [PYTHEAS MailGate](#) - POP3 gateway for Microsoft Exchange and Lotus Domino. Interface for [SpamAssassin](#) and anti-virus scanner, rules based content checking, optional outgoing mail handling.
- [SmartPOP2Exchange](#) - POP3 and IMAP connector for MS Exchange and any other SMTP server, supporting catch-all accounts and virus scanners
- [Spam Blocker SpamArrow](#) for Outlook Express is an Outlook Express plugin spam filter software. It integrates with Outlook Express by adding toolbar buttons to Outlook Express to help fight spams.
- [Spam Blocker for Outlook SpamArrow](#) for Outlook is an Outlook plugin spam filter software. It integrates with Outlook by adding toolbar buttons to Outlook to help stop spams.
- [Secure Mail Intelligence!](#) SMI is a server side e-mail protection solution that combines firewall elements, intrusion detection system, anti-virus and anti-spam modules. SMI! can use up to 7 anti-virus scanners and 3 different spam filtering engines at the same time. Other features include: Routing & Queuing Module, Disclaimer & Messages Module, Updater Module, Policy Module, Mail Storage Module, Image Analysis Module, Cryptography Series and Mail Analysis. SMI! runs on Microsoft Windows 98/NT/2k/XP/2003 platforms (both Professional and Server releases), Linux (i586), OpenBSD, FreeBSD and Solaris 9 (x86 and SPARC).
- [SpamAssassin Caller](#) for IMail (from Ipswitch.com). Simple hook to IMail for calling [SpamAssassin](#) on the IMail server or on a remote (Windows or \*nix) machine. \$45.
- [SpamIntelligence for Outlook](#) is an Outlook Plugin based on [SpamAssassin](#) 3.0 and Clam [AntiVirus](#). Auto-updates, stops new mail notifications for spam and hides greyed-out items in IMAP accounts. Fully supports POP3, IMAP, Exchange, and Hotmail/MSN. Free for personal use.
- [SpamMover for Exchange 2000/2003](#): 'this application can create a folder named Spam in each Exchange 2000/2003 mailbox and move any ingoing message that is marked with specific mail header by anti-spam software like [SpamAssassin](#), to that folder.'
- [Spamnix](#) is a spam-blocking solution designed specifically for Qualcomm Eudora on Windows and MacOS X'.
- [Visnetic Mail Server](#)

### Not Listed?

If your commercial product uses [SpamAssassin](#), and is not listed here, please feel free to edit the page and add details. However, keep it short – preferably just a link – and we reserve the right to edit or even remove whatever's published here (especially if we cannot determine from publically-accessible information that the product *does* use [SpamAssassin](#)).

For fairness, we're trying to keep the items in each category in alphabetical order.
