

DevBookmarks

SA Developer Bookmarks

This page contains some links that make good bookmarks for [SpamAssassin](#) developers and contributors. Please feel free to add more. Note that a link to *this wiki* isn't really necessary though 😊

Bugs

- [All open bugs](#) in the Bugzilla
- [Bug Lookup keyword bookmark](#): suggested keyword "bug"
- [Bugzilla search open bugs keyword bookmark](#): suggested keyword "bs"
- [Bugzilla search all bugs keyword bookmark](#): suggested keyword "bsa"
- [SpamAssassin bug list at the Gentoo Bugzilla](#)
- [SpamAssassin bug list for Debian](#)

QA

- [the Rule-QA system](#)
- ["Bad Rules" report](#), generated daily

Notes

How to use keyword bookmarks in Mozilla/Firefox: right-click on the link, select 'Bookmark This Link...', and add it to your bookmarks. Then open Bookmarks -> Manage Bookmarks..., find the new bookmark, right-click, Properties, and type the desired keyword string in the Keyword: text-box, hit OK, hit File -> Close. Once you've done this, you can then use the URL bar as a command line to search for strings; e.g. sb ALL_TRUSTED will [full-text search all open bugs for the string 'ALL_TRUSTED'](#), and bug 3406 will open [bug 3406](#).
