

EnvelopeSenderInHeaders

Envelope-Sender data in headers

The following MTAs save envelope-sender in Return-Path:

```
gmail      1.03      - compliant
postfix    2.0.12    - compliant
Exchange   2000 SP3  - compliant
Exchange   5.5 SP4  - compliant
sendmail    8.12.x   - compliant
exim        3.36     - compliant
exim        4.30    -compliant
Courier    0.42.2    - compliant
```

(list from spf-discuss list, thread 'Re: [spf-discuss] Is Return-Path as available as we think?', Date: Wed, 28 Jan 2004 06:31:05 -0600 (04:31 PST).)

Also see [EnvelopeSenderInReceived](#) for a proposal to come up with a better way to store envelope-sender data in the headers, resilient in the face of multiple relays.
