EximProcmailCorruptMsgs

I get corrupted messages, when using SpamAssassin with exim and procmail. Help!

Duncan Findlay notes:

I was experiencing a munging problem with spamassasin and exim -> procmail (without fetchmail). For me the problem was in exim.conf.

To fix this, in the transports section, in the procmail_pipe section,

```
        command = "/usr/bin/procmail -d ${local_part}"
```

should be changed to

```
        command = "/usr/bin/procmail"
```

also ensure that in the same section,

```
        user = $local_part
```

This fixed the problem for me. Hopefully this might help someone else.
