

# FORGED MUA OUTLOOK

If you get false positives due to FORGED\_MUA\_OUTLOOK hits, here are some fixes (pick one) for the admin to implement to solve this problem:

- \*upgrade to the newest version of [SpamAssassin](#) (better solution)

- \*edit the line in the file 50\_scores.cf, replacing the #s with smaller #s (e.g. 0 or 1).

This [already-fixed bug](#) happens because a new version of Outlook wasn't recognized by the rules of the old [SpamAssassin](#) installation used on your mail.
