## Outlook Express 6 Forwarding FPs

Messages forwarded automatically by a Message Rule in Microsoft Outlook Express 6 may be marked as junk mail because of a bug in Outlook Express.

If the action of a Message Rule is set to Forward messages, Outlook Express correctly changes the From: header of the forwarded message but does not correctly generate a new message ID, in violation of RFC 2822.

If the domain name in the message ID does not match the domain name in the From: header, the message may hit the [SpamAssassin](#) 'MID\_ADDED\_BY\_RELAY' rules, and therefore may cause a false positive.

This is a bug in Outlook Express, and there is no known workaround. For further details:  
[http://bugzilla.spamassassin.org/show\\_bug.cgi?id=2072](http://bugzilla.spamassassin.org/show_bug.cgi?id=2072)

Update: Mar 2007: the rule is no longer part of SA, removed some time before 3.2.0.
