

# SpamAssassinHistory

## What is the history of SpamAssassin?

[SpamAssassin](#) was originally imported into Sourceforge on 2001-04-20; this was pretty much the very first code for [SpamAssassin](#). The changes can be viewed through the CVS repository on Sourceforge; the link is on the "hacking" page.

Before that, there was filter.plx; this is described at <http://SpamAssassin.org/old/prehistory> .
