

TextWrapError

If you're seeing an error similar to:

```
(?: (?=[\s]))* matches null string many times in regex; marked by <-- HERE in
m/\G(?: (?=[\s]))* <-- HERE \Z/ at
/opt/local/lib/perl5/5.8.7/Text/Wrap.pm line 46.
```

This issue is popping up more and more on the users list and in irc. The short version is that newer versions of Text::Wrap (not associated with SpamAssassin) throw this warning for a regular expression that has been in use for years. It's been reported as a bug to the Text::Wrap authors already.

3.1.8 and 3.2 and beyond have a work-around to avoid displaying the warning from `Text::Wrap`. Alternately, you can downgrade your installation of `Text::Wrap` to an earlier version which doesn't have this issue.

This issue was originally reported in [SpamAssassin](#) Bugzilla ticket 5056:

http://issues.apache.org/SpamAssassin/show_bug.cgi?id=5056

For a discussion about downgrading Text::Wrap, please see the following thread:
