

ReleaseNote46

November 2013, Apache Solr™ 4.6 available

The Lucene PMC is pleased to announce the release of Apache Solr 4.6

Solr is the popular, blazing fast, open source NoSQL search platform from the Apache Lucene project. Its major features include powerful full-text search, hit highlighting, faceted search, dynamic clustering, database integration, rich document (e.g., Word, PDF) handling, and geospatial search. Solr is highly scalable, providing fault tolerant distributed search and indexing, and powers the search and navigation features of many of the world's largest internet sites.

Solr 4.6 is available for immediate download at:

<http://lucene.apache.org/solr/mirrors-solr-latest-redir.html>

See the CHANGES.txt file included with the release for a full list of details.

Solr 4.6 Release Highlights:

- * Many improvements and enhancements for shard splitting options
- * New AnalyzingInfixLookupFactory to leverage the AnalyzingInfixSuggester
- * New CollapsingQParserPlugin for high performance field collapsing on high cardinality fields
- * New SolrJ APIs for collection management
- * New DocBasedVersionConstraintsProcessorFactory providing support for user configured doc-centric versioning rules
- * New default index format: Lucene46Codec
- * New EnumField type

Solr 4.6 also includes many other new features as well as numerous optimizations and bugfixes.

Please report any feedback to the mailing lists
