

ReleaseNote701

6 October 2017, Apache Solr™ 7.0.1 available

Solr is the popular, blazing fast, open source NoSQL search platform from the Apache Lucene project. Its major features include powerful full-text search, hit highlighting, faceted search and analytics, rich document parsing, geospatial search, extensive REST APIs as well as parallel SQL. Solr is enterprise grade, secure and highly scalable, providing fault tolerant distributed search and indexing, and powers the search and navigation features of many of the world's largest internet sites.

This release includes 2 bug fixes since the 7.0.0 release:

- * Solr 7.0 cannot read indexes from 6.x versions.
- * Message "Lock held by this virtual machine" during startup.
Solr is trying to start some cores twice.

Furthermore, this release includes Apache Lucene 7.0.1 which includes 1 bug fix since the 7.0.0 release.

The release is available for immediate download at:
