Release Highlights

Solr 3.3 Release Highlights

- Grouping / Field Collapsing
- A new, automaton-based suggest/autocomplete implementation offering an order of magnitude smaller RAM consumption.
- KStemFilterFactory, an optimized implementation of a less aggressive stemmer for English.
- Solr defaults to a new, more efficient merge policy (TieredMergePolicy). See <http://s.apache.org/merging> for more information.
- Important bugfixes, including extremely high RAM usage in spellchecking.
- Bugfixes and improvements from Apache Lucene 3.3
