

WikiFiles

This page should contain:

- Wiki-related files like optional CSS scripts.
- Non-image attachments like binary code files.

Decrease Wiki font size

A registered user can change the way wiki looks by providing link to a custom CSS file on [UserPreferences](#) page. One of the changes one may want to make is to reduce font size. By using [smallerfonts.css](#) stylesheet the font size can be reduced from 1em to 0.8em.
