

HBase 0.90.7 RC Test Matrix

Release version: HBase 0.90.7 RC0

Category	Reporter	Underlying Hadoop version	Tests run	+1/0/-1	Results details
Master					
Log splitting					
Distributed log splitting					
Load balancer					
Regions in transition					
Region server					
Flushes					
Compactions					
Splits					
Block cache					
Client					
Java					
Thrift					
REST					
Shell					
Tools					
Scripts (e.g. graceful stop)					
Bulk load					
CopyTable					
import/export					
importtsv					
hbck					
Metrics					
Coprocessors					
Security					
Kerberos authentication					
ACL coprocessor					
TokenProvider coprocessor					
Replication					
Master-slave					
Master-master					
Cyclic					
Compression					
Snappy					
LZO					
Performance					
YCSB					
PerformanceEvaluation					
LoadTestTool					
Compatibility					
Client-server compatibility between minor versions					
Server-server compatibility between minor versions					
Client-server compatibility between major versions -+1					
Server-server compatibility between major versions -+1					
Client-server compatibility between major versions > -+1					
Server-server compatibility between major versions > -+1					
Manual rolling restart between this version and previous version (minor or major)					
Configuration					
System					
TestLoadAndVerify					
TestAcidGuarantees					
TestConcurrentScanAndPut					
Failover to backup master					
Kill RS					
Kill RS holding .META.					
Kill RS holding ROOT					
New features					
e.g. Snapshots					
Documentation
