

# HadoopMapReduceTips

Describe [HadoopMapReduceTips](#) here.

This will be a hub for Map Reduce tips and information.

## Tips

- [Configuring Mappers and Reducers](#) - adding code to execute when the mapper or reducer is instantiated.
- [Sequence File Format](#) - an extremely helpful input/output data format.
- [Programmatically Reading from DFS](#) - Example of reading a sequence file off DFS during the configure method.
