

# Hive

The Apache Hive wiki has moved to [Confluence](#)!

If you're looking for a particular page name, try [this list](#).

(There's also a [generated HTML version](#) of the Confluence content. Please keep this link here so that search engine crawlers can find it; they're blocked from the live Confluence content by a robots.txt file, and we want them to find the HTML anyway to reduce load on Confluence.)
