

Jetspeed2 PluggableEngineComponents

Jetspeed 2 Engine Components

Here is a list of most of the components used by the [Jetspeed 2 Portal Engine](#).. These components are assembled by the [ComponentManager](#), which is implemented using the [Spring Framework](#). That being the case, those familiar with the Spring Framework will immediately recognize the xml used to configure the components.

Engine Component Organization

- [Core Engine Components \(WEB-INF/assembly/jetspeed-spring.xml\)](#)
- [Pipeline Components \(WEB-INF/assembly/pipelines.xml\)](#)
- [Pluto Factory Components \(WEB-INF/assembly/pluto-factories.xml\)](#)
