Jetspeed2 PluggableEngineComponents

Jetspeed 2 Engine Components

Here is a list of most of the components used by the Jetspeed 2 Portal Engine.. These components are assembled by the ComponentManager, which is implemented using the Spring Framework. That being the case, those familiar with the Spring Framework will immediately recognize the xml used to configure the components.

Engine Component Orginization

- Core Engine Components (WEB-INF/assembly/jetspeed-spring.xml)
- Pipeline Components (WEB-INF/assembly/pipelines.xml)
- Pluto Factory Components (WEB-INF/assembly/pluto-factories.xml)
