

# Jetspeed2 Tiles

Tiles has been tested by Trey Drake with the My Faces JSF implementation atop J2. It works without a hitch after a slight modification to `JspTileViewHandlerImpl`

Modify `JspTileViewHandlerImpl`:

```
(ServletContext) externalContext.getContext() >>
ServletContext servletContext =
((JetspeedPortletContext)
externalContext.getContext()).getServletContext();

Modify tiles-faces-config.xml so that it references
the above class; e.g.,

<application>
<view-handler>com.foo.Jetspeed'ifiedJspTilesViewHandlerImpl</view-handler>
</application>
```
