

Pluto Pluto1.1ExamplePortlet

Hello World Example Portlet for Pluto 1.1

Here is a zipped 'Hello World' example that builds and deploys into Pluto 1.1 with Ant or Maven. See the comments in the build.xml or pom.xml files for details.

[Get the file here](#)

Both builds require you to set the CATALINA_HOME environmental variable to the root directory of your Pluto 1.1 binary install.

To run the Maven 2 build and deployment, run the command:

mvn integration-test

To run the Ant build and deployment, run the command:

ant deploy
